

Our purpose is to show that anyone can grow some of these mosquito repellent plants next to their own front door or on a small balcony or patio. We urge you to try, thereby reducing the use of chemical deterrents.

**HELP KEEP WATERWAYS
AND OUR CHESAPEAKE
BAY CLEAN.**

Some other possible plants not shown are

- Basil
- Lemon Balm
- Lemon Verbena
- Marigolds
- Tansy
- Citronella Grass

Besides being pest deterrents, all plants shown here also attract many beneficial pollinators such as bees and butterflies.

All photos used in this brochure from Wikipedia.

Much information is available from many internet sources on the preparation and use of these plants for mosquito repellent products you can prepare in your kitchen.

REMEMBER TO USE CARE IN TRYING ANY PLANT REMEDY.
