**MINUTES OF THE
BUDGET WORK SESSION**

April 19, 2011
18

- I. Bruce A. Wahl, Mayor, called the meeting to order at 7:00 p.m. In attendance were: Dr. Valerie Beaudin, Robert Carpenter, Stewart Cumbo and Julie Spano, Council Members, Dr. James Parent, Town Administrator, Sharon L. Humm, Town Clerk, Leslie Porter, Town Treasurer, Wilson Cochran, Superintendent of Public Works and Jon Castro, Wastewater Treatment Plant Superintendent. Absent were Ingrid Lamb and Patrick Mahoney, Council Members.
- II. **Pledge of Allegiance** – Mr. Cochran led the Pledge of Allegiance.
- III. **Present the FY12 Budget for the Wastewater Treatment Plant Fund and the Utility Fund to the Town Council** – The Mayor started the meeting off by thanking all the staff for the tremendous amount of work and time that went into preparing the proposed budget and asked Mrs. Porter to start off with the Treatment Plant Fund first and stated that Mr. Castro was present to address any questions the Council might have.

Mrs. Porter prepared and submitted to Council a proposed Exhibit A and worksheet. Mrs. Porter stated that these were the same figures as presented in the work session held in February for the WWTP with no changes.

Mr. Carpenter stated, at the appropriate time, he would be making an amendment to the Treatment Plant Fund budget in the amount of \$16,000 from Calvert County.

The Mayor was pleased to add that since assuming responsibilities for the Plant, by choosing an alternative method for the disposal of the sludge, that the Town is saving money in not having to transport it as in the past.

Mr. Carpenter asked Mrs. Porter to elaborate on the 4.692 million total capital expenditures for the FY12 versus the 1.048 million in FY11 and to briefly go over the grants under Revenues.

Mr. Castro gave an update on the status of the ENR project for Dr. Beaudin.

Utility Fund
Expenditures-Sewer:

Mrs. Porter briefly went over the sewer expenditures, highlighting the TPF fixed and variable costs, interest expense and principal, a new line item added for FY12, Reserve for Contingencies, and operating capital expenditures presenting a summary sheet of Capital requests for FY12.

Dr. Beaudin asked Mr. Cochran to prioritize the capital items being requested. Mr. Cochran stated the handheld meter reader and the spare pumps were high priority but the other items were also important needs as well. There was a suggestion that the handheld meter reader could be purchased with funds available in the FY11 budget.

Expenditures-Water

Mrs. Porter reported that there were very few changes in numbers under the water expenditures but added that a new line item, Reserve for Contingencies, was added. Mrs. Porter went over the water and sewer combined expenditures and the revenue in excess of expenditures summary sheet.

Utility Fund Capital Projects:

The Mayor asked Mr. Cochran to briefly go over the capital projects which include, the Bayside Road water line improvement, the 13th Street water line improvement and the Richfield Station water tower improvement.

The remainder of the work session consisted of the Mayor and Mrs. Porter presenting to Council the proposed utility rate structure. The Mayor stated that the capital connection fee for water and sewer would remain the same and anticipates receiving payment for 48 capital connections for FY12. The Mayor showed through a spreadsheet the FY12 estimated costs, fixed and variable, for water and sewer, factoring in the estimated number of system EDU's, gallons produced, and a proposed subsidy using 80% capital connection fees to reach the proposed figures:

Annual cost per EDU for water - \$114.46, breaking down to a quarterly cost of \$28.61 **plus** a cost of \$.61 per thousand gallons used.

Annual cost per EDU for sewer - \$215.90, breaking down to a quarterly cost of \$53.98 **plus** a cost of \$1.92 per thousand gallons used.

The Mayor requested Council input regarding subsidy percentages and desired ending fund balance reserves.

The Mayor stated that although he was not a fan of raising water/sewer rates, he, on the other hand, had to succumb to the fact that the system needs to be able to sustain itself.

The Council suggested and discussed other options such as maybe phasing the proposed rates in over a period of years. The Mayor asked the Council to consider what had been brought before them and send their comments via email to Mrs. Porter.

The meeting adjourned at 9:23 p.m. on a motion by Dr. Beaudin. Seconded by Mr. Cumbo, all in favor.

Public Works Report

Water Park – The renovation to the snack bar is well underway and proceeding as planned. We will begin to dewinterize the water park by the end of the month.

Graffiti – We continue to take care of graffiti as we find it. No major incidents of graffiti have been reported in the last month.

SCADA – The SCADA system is still performing well. We will be adding the new tower to SCADA as we bring it online. We are also looking for ways to increase the amount of data we can collect and streamline the data we are currently getting to make the system better and more efficient.

Richfield Station Wet Well- We continue to monitor the control. We have had no significant change in the operation and there are no incidents to report.

Snow Removal- The snow season had one last shot to give us before leaving for the year. Fortunately the crew was ready for it and there was little to no accumulation on the roads.

Flushing- The spring flushing was completed and we are in the process of reviewing the current Unidirectional Flushing plan. We are also pulling together the plans for the new sections of Richfield Station and Chesapeake Village. The new tower will be added to the plan when it is brought online.

Water Leaks- The Public Works Crew has been dealing with a rash of spring water leaks. They are being addressed in order of seriousness and repaired as quickly as possible. This is a normal occurrence as we come out of a winter season and the ground begins to thaw.

TOWN OF CHESAPEAKE BEACH
Engineering Report

Trail – The trail is nearing completion. All pilings are in and the Bayview Hills and Calvert County Park portions of the trail are paved. The boardwalk decking and structural portions are currently being constructed (see attached update).

WWTP – (ENR upgrades) – Design is ongoing. The 90% design submittal has been provided for our review and a meeting is scheduled for the end of April to discuss. We have implemented ways to efficiently dispose of the sludge now and when the ENR project is completed. We are currently seeking grant funding from the EPA for a portion of the project.

Chesapeake Village Water Tower – The steel tank is erected and the internal piping and electrical systems are nearly complete. Substantial completion is pending. Final completion has been moved to May 2011 – weather depending. The new well has passed all MDE required tests and should be on line with completion of the tower (see attached update).

Kellams Field Reconstruction – Remaining items include the press box and batting cage platform and punch list items. Homes by Les is currently working on these items.

Dredge Spoil Site – The Permit to raise the spoil site embankment has been issued and work is ongoing. The first of three – “1 foot lifts” of dirt has been placed. We are working with MDNR and have obtained \$75K to fund a partial dredging until the Federal project commences. The Corps of Engineers has put the channel dredging project out for public notice and is proceeding with design and permitting. Bids are due to perform the dredging on April 19th. The Corps just completed the soil boring analysis for the dredge material. The study shows that the material is more of a silty sand. This material is not within specifications to be directly placed on the beach at North Beach. We are working with the Corps to determine alternate solutions for the silty sand disposal.

SCADA – The new water tower and flow meters are to follow. The new Chesapeake Village Tower is currently being added to the system.

Richfield Station – Preparations are being made over the long term maintenance for the water tower structure. The traffic calming and stop signs are installed.

Water Park – The concession building is under construction and is on schedule for the opening of the park.

‘B’ Street Boardwalk – The Phase II Boardwalk replacement bids are in. The low bidder was GOEL Services, Inc. Work is to begin at the end of April.

Water Park Report

Marilyn VanWagner,
General Manager Water Park
April 15, 2011

Concession Stand-

Construction is underway. The outside frame of the building almost complete. The Contractor is Absolute Quality Construction.

Operations-

-Continue to work on putting together an Operations Manual for the Water Park. This manual will help with the training of new employees as well as serve as a guide for all future management teams. The manual is very detailed and to date is about three quarters completed.

Staffing -

We have collected over 300 applications for the for the 2011 Season. The final cuts will be made in the next two weeks for the 160 employees that will be hired.

Lifeguard Training starts the end of next week. The Cashiers will be trained next week also. Concession Workers, Gate Keepers, Cart Drivers and Rovers to follow shortly. With the use of Social Networking and an employee recruitment plan that was put into place, we did not have to spend advertising dollars on hiring.

POS System -

- Met with our current rep for DBS, Mike Holtzman, last month and just heard recently about the results of some of the equipment. It looks like some of the Computers in the Cash Registers are more worn then we realized. In addition to the three that were being added with the new concession stand and satellite concession, we will need to also replace three.

Marketing -

- We will be offering the "Family" Season Pass again this year which is a special only for Chesapeake Beach Residents. When the entire family joins, each family member will enjoy a 50% savings when compared to the price of an individual pass season pass in Chesapeake Beach.

We have contracted with Splash Radio, so we WILL have music this year at the Park. The music will be offered through a company called Splash Radio, and we liked the name so our radio station will also be called "Splash Radio". In addition to having Music, this will enable us to make announcements more effectively(guests may actually hear them now), give groups recognition, advertise our sponsors, and notify the customers about special events.

- According to the Calvert County Camp Counselors, there has been about a 25% drop in campers attending camp this summer due to the economy. However, by attending "Camp Fairs", and being more assertive with our sales campaign we have not seen a drop in our bookings this year so far.

Character Days-

The Rental Agreements have been signed and so we will definitely have "Character Days" this year. Coming this year, in our very own Water Park we will have some visitors. Sponge Bob, Dora the Explorer and Bob the Builder will all be visiting our Water Park this summer! Parents and Grandparents get your cameras ready!

Night Slides -Friday evenings from June 17 - August 19, come swim and slide with us. We will be open until 10:30 PM on those Friday evenings! We look forward to seeing you!

Maintenance -

- The nets around the slides are being replaced.
- The entire park is getting power washed before we open and the ropes will be power washed instead of replaced.
- Concrete cracks are getting fixed.
- The broken and unsafe "Water Tower" was removed and is being replaced with a Water Spray system under the bridge.
- The stairs, risers and rails leading to the Blue and White Slide will be sanded and painted.
- Gathering a few estimates to repair a few of the slides.
- Lots of touch up painting around the park is on the schedule.

Chesapeake Beach Wastewater Treatment Plant Report

Jon Castro, Plant Superintendent

April 15, 2011

Plant operation:

Plant personnel conducted a Plant Tour for three EPA Officials and the Town Administrator, Jim Parent, on March 14, 2011. The EPA Officials were in Town to discuss the upcoming ENR Project.

The MDE inspector for Wastewater Treatment Plants conducted a Plant inspection on March 21, 2011. The inspector found a few minor errors in the lab operations and DMR reports but noted an improvement in the plant process control. All the minor errors were corrected in the lab and the DMR reports in mention were resubmitted to MDE.

There were no incidents to report in the plant's Solids Handling Operation or the lab sampling operation. The operations have been performing as expected.

The Plant did not record any high flow incidents for this report. The last occurrence for the plant to use the Shellfish Tank occurred on March 10, 2011 due to heavy rainfall.

The Wastewater Treatment Plant had no violations or spills to report.

Future Projects:

The 90% design stage for the ENR upgrade meeting with the design engineers and parties involved with the project will take place on April 18, 2011 at Town Hall.
